

CHOOSE THE RIGHT TRUCK SCALE

When comparing other truck scales, make sure you choose the right one for your application. B-TEK Scales, LLC truck scale line is the right choice for you no matter which one you choose.

UNMATCHED EXCELLENCE. B-TEK manufactures a full line of the longest lasting truck scales, rail scales, and floor scales on the market. B-TEK also manufactures industry-leading industrial scales and weighing equipment for any application. Due to B-TEK's wide range of options and materials, we are a leading provider of high quality industrial scales.

EXPERIENCE. B-TEK has a proud history that reaches back further than its 1994 inception. With multi-generational trade experience, the B-TEK team brings over 75 years of industry know-how to the table. This long-term knowledge of the weighing industry enables B-TEK Scales to focus on innovation and developing high quality solutions for our customers.

TECHNOLOGY. In 2003, B-TEK announced a joint venture with the Bilanciai Group of Modena, Italy, the largest truck scale manufacturer in the world. The Bilanciai Group's advanced manufacturing techniques, combined with B-TEK's outstanding product lines, provides customers with the highest quality and longest lasting scales in the world.

EXTENSIVE PRODUCT LINE. B-TEK offers an extensive line of truck scales spanning across all industry applications and sizes. As a comprehensive scale manufacturing company, B-TEK designs and builds solutions for a wide range of industries such as agricultural, logistics, industrial, steel, coal, waste, recycling, and aggregate. B-TEK has the ability to manufacture standard and custom scales in full electronic digital, analog, and electro-mechanical configurations.

CUSTOMIZATION. B-TEK is proud to be known for its ability to manufacture high quality, custom scale platforms. From nonstandard sizes to retrofitted components, B-TEK's commitment to quality and service will deliver a product that fits seamless within our customers' current configurations

ADVANCED MANUFACTURING. Through the use of cutting-edge manufacturing techniques the Centurion-AT continues to set the standard of quality within the truck scale industry. From B-TEK's plasma cutting table designed to hold aircraft quality tolerances to our steel cleaning and painting line, each and every operation is designed to build the most reliable truck scales on the market.

HIGH QUALITY CRAFTSMANSHIP. B-TEK's truck scales are assembled by highly skilled individuals who bring decades of experience to each operation. Combine these individuals with a culture dedicated to high quality and the result is a weighbridge constructed with a level of accuracy that cannot be matched.

CUTTING-EDGE TECHNOLOGY

Over 95 years of combined manufacturing experience

CENTURION-AT TRUCK SCALE

B-TEK's Centurion-AT Truck Scale is built from the ground up with cutting edge technology designed to provide unmatched reliability and accuracy. The Centurion-AT achieves this industry leading performance through the use of the B-TEK CPR-M Analog Load Cell, unique beam design, and advanced manufacturing practices. These features are designed to work together to stand up to the harshest environments.

CPR-M Analog Load Cell

The CPR-M is a robust analog load cell housed in a laser welded stainless steel housing. In addition to its protective exterior the CPR-M also uses a poly coated stainless steel sheath to protect the integral cable. This load cell design provides accurate weight measurements without the need for mechanical linkages.

Heavy Steel Beam Design

The Centurion's design focuses on strength and stability. Each module is constructed using structural steel I-Beams which provide superior support compared to competitor's weighbridges which are built using bent plate material. The Centurion's open beam design also allows for continuous airflow around the beams lowering the risk of rust or corrosion.

Full Access Cover Plates / End-Wall Clearance

The Centurion-AT's modular weighbridge features full-width sectional and center cover plates that make each load cell accessible for easy installation, calibration, and replacement, decreasing scale downtime.

The Centurion-AT's design positions the load cells 14" from the end-wall. This positioning prevents dirt, debris, or ice from interfering with the scale's operation.

Steel Preparation / Paint System

B-TEK's prepares all steel by cleaning to the SSPC-SP6 specification. The Centurion is first painted with a two-part epoxy primer (2-4 mil) followed by a two-part polyurethane paint (2-4 mil).

DECK OPTIONS

CONCRETE

The Centurion-AT's 8" concrete deck option improves traction in times of inclement weather.

GALVANIZED

A hot dip galvanized finish weighbridge will stand up in the toughest conditions.

STEEL DECK

The Centurion-AT is the only truck scale on the market to come standard with a 3/8" steel deck plate.

*Shown with optional single pipe sight rail.

WARRANTY

The Centurion-AT has an available industry leading 5-Year warranty covering the weighbridge, J-BOX, and load cells.

HARDWARE OPTIONS

CATWALK

GRAIN DUMP

RISERS

DRIP PITS

DOUBLE PIPE SIGHT RAIL

SYSTEM OPTIONS

DD Series

The DD Series terminals combine computer programming power and flexibility together with the measuring requirements of a weighing instrument.

Traffic Lights

B-TEK's traffic control packages are available in single or multiple light configurations.

Scoreboard

These high-intensity LED displays are designed to ensure proper visibility in any environment.

ScaleSoft.NET

B-TEK's truck management software is fast, flexible and easy to use.
